

We want to hear from you!

Are you enrolled in a Medicare Advantage plan with extra benefits, such as grocery cards or in-home care?

Have you used your extra benefits, or have you had trouble accessing your benefits?

We are recruiting people like yourself to participate in a conversation about your experience.

Most Medicare Advantage plans offer benefits, such as dental, vision, and hearing, to people enrolled in their plans. Medicare Advantage plans can also offer **extra benefits** such as grocery cards, help with utility bills, in-home care, and/or transportation to non-medical locations.

*If you are in a plan that has these **extra benefits** and are interested in sharing your experience shopping for plans with extra benefits, comparing, and/or using the benefits, please fill out this form by **Wednesday, January 29th**: [Focus Group Questionnaire](#)*

If you qualify for participation in a focus group, we will follow up with next steps and extend a formal invitation to participate.

A \$50 gift card will be offered if you are selected and participate in a focus group.

About Us

ATI Advisory, a healthcare research and advisory services firm, and The SCAN Foundation, an independent public charity devoted to transforming care for older adults, are leading this research. Our goal through this work is to elevate the voices and opinions of Medicare beneficiaries so that the extra benefits being offered reflect their needs and preferences. We want to understand your experience with extra benefits so that we can suggest policy changes to ensure the benefits meet your needs.

Your responses and feedback during the focus group will stay private. We will not share your name or personal information or ask about your medical history or current health.
