

SHIP TA Center Webinar Announcement

Entering PDP and MA-PD Cost Changes into STARS

Friday, September 11, 2020 | 2:00 pm - 3:30 pm Eastern Time

Description: ACL uses STARS to collect data related to the cost changes as result of enrollment in Part D prescription drug plans (PDPs) and Medicare Advantage plans with prescription drug coverage (MA-PDs) available through the Medicare Plan Finder (MPF).

By collecting this data, SHIPs can demonstrate the impact of their work on behalf of beneficiaries in three ways:

1. Data on the number of beneficiaries who received PDP/MA-PD enrollment assistance from SHIPs;
2. Data on the average cost change per beneficiary who received PDP/MA-PD enrollment assistance from SHIPs;
3. Data on the reported total of PDP/MA-PD cost change for each state.

In this webinar, you will learn how to accurately enter these cost changes on the beneficiary contact form, what documentation is required, and how to properly provide that documentation.

Speakers: Melissa Simpson and Akia Dieuseul, ACL; and Ginny Paulson, SHIP TA Center

Audience: This webinar is relevant to all STARS users who also help beneficiaries with enrollment and report the associated cost changes. It may also be relevant to users who enter their SHIP data into a proprietary data system other than STARS, as long as they are helping beneficiaries enroll and reporting the associated cost changes. Note: With the addition of the "Can See STARS Resources" checkbox on user profiles at www.shiptacenter.org, STARS webinars are advertised to individuals with that box checked, in addition to the SHIP director listserv.
