

Medicare's Limited Income NET Program

administered by Humana®

Medicare's Limited Income NET Program (LI NET) 60 Day Days Supply Limit

What's happening?

Effective February 8, 2018 Medicare's Limited Income NET program (LI NET) will limit the days supply for prescription drugs to no more than a **60-day dispense per fill**. The maximum days supply for the below mentioned scenarios, will remain the same:

- **Hepatitis C drugs**- maximum days supply is **30**
- **Opioids**- maximum days supply is **30**
- **Unconfirmed beneficiaries** (beneficiaries who have not been deemed eligible for LI NET)- maximum days supply is **34**

How will this impact the beneficiary?

Many beneficiaries will not be impacted because this does not change anything for those receiving a 30-day supply of medication.

If the pharmacy attempts to fill a medication with a days supply greater than 60 days, the claim will reject immediately, prompting the pharmacist to reduce the days supply.

An NCPDP error code 76 "Plan limitation exceeds" with additional error messaging "Days supply is more than allowed by the plan; submit value < or =60" will be returned to the pharmacy.

Beneficiaries who require a days supply greater than 60 days should file a Coverage Determination Exception request with **LI NET**.
